

How To Mend a Hole

Equipment Needed

- * Small needle
- * Thread to match the garment
- * Scrap of fabric in the same colour

Step One

Holes need to be strengthened so find a piece of fabric in the same colour as the garment - it should be just larger than the hole .

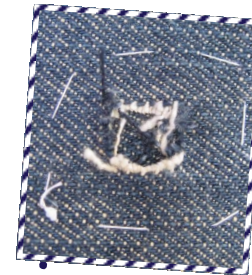

Step Two

Position it behind the hole and tack in place.

Step Three

Then working from the right side you can either close the gap using a single thread and needle to pick up threads from either side of the hole and draw it closed, catching the fabric underneath as you go, or if you want to make a feature of the hole on trousers you can use a sewing machine to sew around the hole catching the fabric underneath as you go.
