

How To Mend a Rip or Hole using Korbond Iron on Mender

Equipment Needed

- * Korbond Iron on Mender
- * Iron
- * Ironing board
- * Ironing Cloth

Step One

Tidy frayed edges from torn or ripped areas and turn garment inside out.

Step Two

Make a pattern of the hole / tear with paper.

Step Three

Using the pattern, cut a suitable piece of surplus material or piece of fabric chosen to match.

Step Four

Place material in the hole and iron into place.

Step Five

Cut mender larger than damaged area and round the corners with scissor to prevent fraying.

Step Six

Place mender, adhesive side down, over the material and hole/ tear on the inside of garment.

Step Seven

Set iron to required temperature.

Iron On Mender			
POLYESTER MIX (Poly 65% Viscose 35%) Boys School Trousers (with Teflon)	8-10 secs		
POLYESTER MIX (Poly 81%, Viscose 18%, Lycra 1%) Girls School Skirt		5-8 secs	
COTTON (100%) Polo Shirt		5 secs	
COTTON (100%) School Uniform Jumper		8-10 secs	
POLYESTER/ COTTON MIX (Poly 65%, Cotton 35%) School Shirt	5-8 secs		
COTTON (100%) Kids Jeans			8 secs
LINEN (100%) Trousers		8-10 secs	

Step Eight

Place ironing cloth over the garment and iron for required time.

Step Nine

Allow to cool for 5 minutes, test to see if fully bonded. If not fully bonded repeat step seven.
