

How To Mend a Rip

Equipment Needed

- * Small needle
- * Thread to match the garment
- * Scrap of fabric in the same colour
- * Korbond Hemming Web

Step One

Rips need to be strengthened so find a piece of fabric in the same colour as the garment - it should be just larger than the rip.

Step Two

Sandwich a piece of Korbond Hemming Web, just longer than the rip, between the spare piece of fabric and the rip.

Step Three

Using a damp cloth, press with a hot iron.

Hemming Web			
POLYESTER MIX (Poly 65% Viscose 35%) Boys School Trousers (with Teflon)			23-25 secs
POLYESTER MIX (Poly 81%, Viscose 18%, Lycra 1%) Girls School Skirt			23 secs
COTTON (100%) Polo Shirt			18 secs
COTTON (100%) School Uniform Jumper			25 secs
POLYESTER/ COTTON MIX (Poly 65%, Cotton 35%) School Shirt			15-18 secs
COTTON (100%) Kids Jeans			25-30secs
LINEN (100%) Trousers			25-30 secs

Step Four

You can then over sew over the rip by hand with matching thread for extra strength (see How To: Oversew).
